

BEDRE HEALTH
EMPOWERING WELLNESS. INSPIRING GROWTH

SCAN TO REFER

A psychiatric partner for your clients — *without the wait.*

Telehealth psychiatric evaluation & medication management across
Massachusetts and New Hampshire — appointments in days, not months.

Dear colleague,

When your client needs a medication evaluation, the therapy you're doing shouldn't stall while they wait months for psychiatry. Bedre Health provides fast, conservative psychiatric care that treats **medication as the life jacket and your therapy as the swim lesson** — minimum effective dosing, regular reassessment, and de-prescribing when your client is ready.

HOW WE WORK WITH THERAPISTS

- ✓ **You stay the therapist.** We handle evaluation and medication management and coordinate with you — never compete for the therapy relationship.
- ✓ **Collaborative by default.** With client consent, we share evaluation summaries and medication changes, and welcome your clinical input.
- ✓ **Thorough first visits.** 60–90 minute comprehensive diagnostic evaluations — not a 15-minute med check.
- ✓ **Conservative prescribing.** A de-prescribing philosophy: medication supports the work, it doesn't replace it.
- ✓ **Your referrals get priority scheduling** — typically seen within days.

WHO WE SEE

Children, teens & adults with anxiety, depression, ADHD, OCD, bipolar disorder, PTSD, PMDD, insomnia, grief & loss, and burnout. Secure video visits — clients are seen from home, anywhere in MA or NH.

Insurance

Most major commercial insurances accepted, including Aetna, BCBS, Point32 (Harvard Pilgrim/Tufts), Optum, Evernorth, MGB, TriCare, Medicare & Medicare Advantage (Part C) plans, and more.
